

# APPENDIX E - INSPECTION REPORT

## Construction Storm Water Pollution Prevention Plan Pedestrian & Bike Trail

Project Name:

Inspection Date:  Time:  Inspector:

Current Weather Condition:

Reason for Inspection:  Regular Inspection  Post Rainfall (Rainfall Amount )

**STAGE OF CONSTRUCTION:**

- |  |   |
|--|---|
| <input type="checkbox"/> Pre Construction                      | <input type="checkbox"/> Initial Installation of BMPs |
| <input checked="" type="checkbox"/> Site Clearing              | <input type="checkbox"/> Rough Grading                |
| <input type="checkbox"/> Temporary Stabilization               | <input type="checkbox"/> Finish Grading               |
| <input type="checkbox"/> Final Stabilization/Post Construction |   |

**INSPECTION CHECKLIST:**

YES NO N/A

- Construction entrance adequately maintained?
- Have all sediment controls been placed prior to site disturbance?
- Have all sediment control measures been properly utilized?
- Have all soil stockpiles been stabilized with appropriate BMPs?
- Are all perimeter controls installed and maintained?
- Are finished slopes adequately stabilized?
- Are temporary stabilization practices adequately utilized?
- Have all disturbed areas been temporarily or permanently stabilized within 14 days?
- Are drainage outlets adequately stabilized and maintained?
- Do all storm water inlets have adequate protection?
- Does permanent vegetation provide adequate stabilization?
- Are utility trenches stabilized properly?
- Are soil and mud kept off public roadways at site access points?
- Are all perimeter controls installed and maintained?

# APPENDIX E - INSPECTION REPORT

## Construction Storm Water Pollution Prevention Plan Pedestrian & Bike Trail

**INSPECTION CHECKLIST CONTINUED:**

YES NO N/A

- Have all temporary control devices that are no longer needed been removed?
- Have all control repairs and sediment removal been performed?
- Are seeding, mulch and other stabilization methods adequately maintained?
- Are measures being taken to control dust?
- Are utility trenches being properly backfilled, compacted and stabilized?
- Have all silt fences been repaired and/or replaced after utility work?
- Are seeding, mulch and other stabilization methods adequately maintained?
- Are temporary stream crossings of non-erodible material installed where applicable?
- Are sediment filtering devices being used during dewatering activities.  
Please describe dewatering activity and controls being used?

- Is there evidence of sediment leaving the site affecting downstream property (public roadways, waters, wetlands streams, lakes)?

**What corrective action measures are being taken to bring the site into compliance:**

Informed of non-compliance. Contractors to sweep area as needed. City Sweeper available.

**Deadline date for all corrective action measures:**

ASAP
