DESCRIPTION OF PROJECT

OVERVIEW:

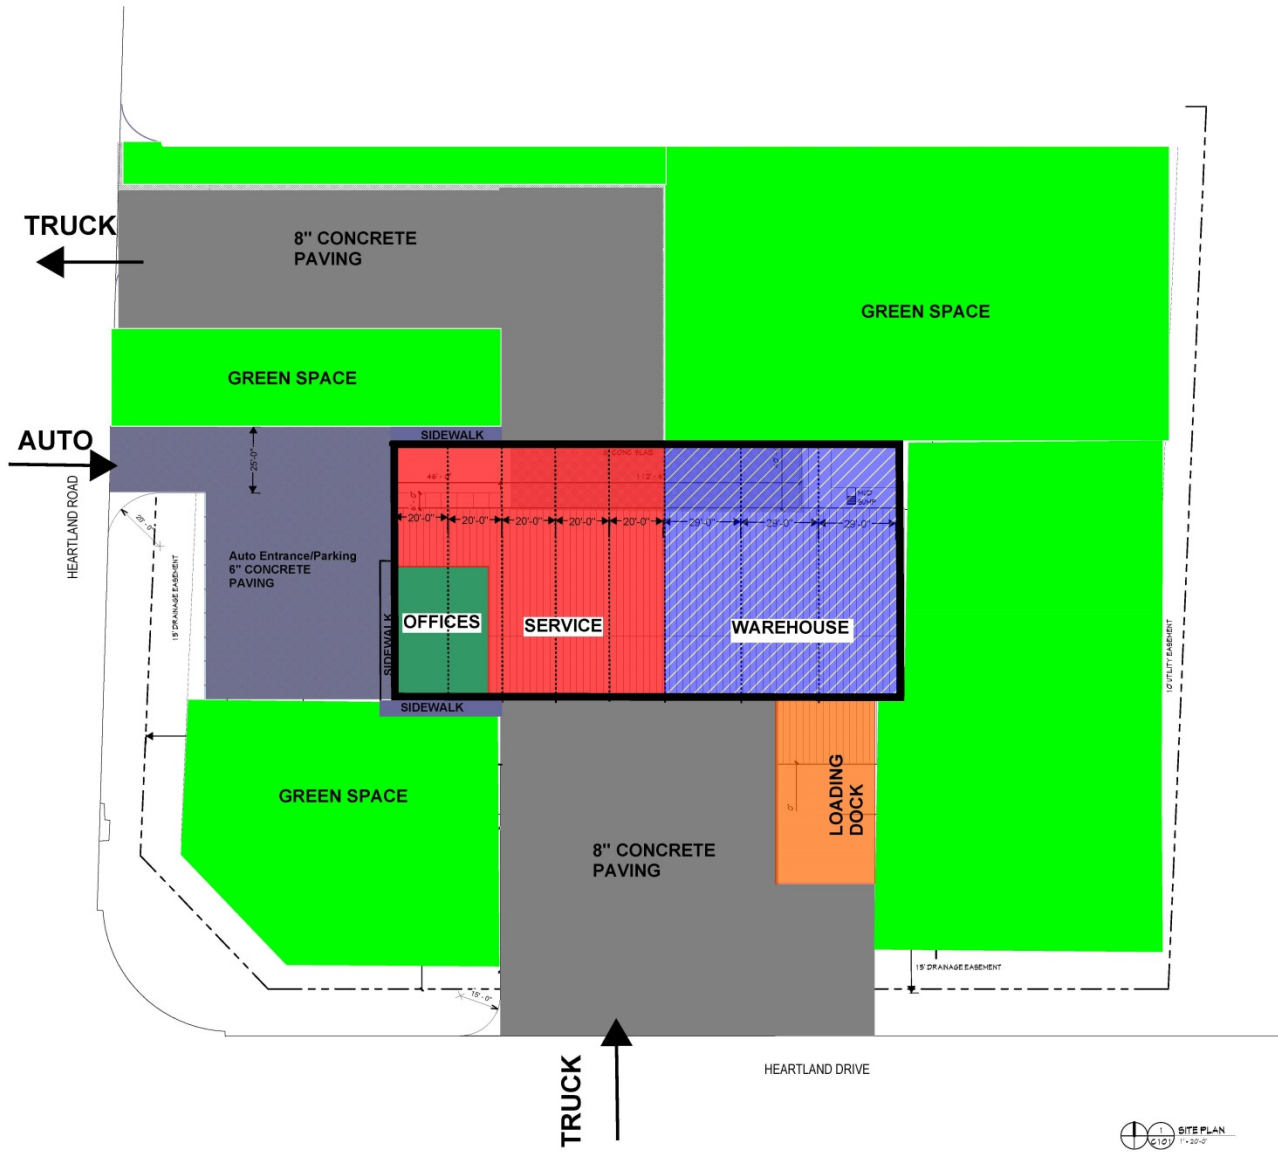

This plan is intended to redevelop an area within the City of Lexington, which has been declared blighted and substandard within the meaning of the Community Redevelopment Law of the State of Nebraska.

The Developer intends to acquire, develop and rehabilitate the real estate shown on Exhibit A to the Redevelopment Contract by constructing a minimum 18,000 square foot tire center, for the retail, installation, and repair of tires and the general servicing of vehicles. It is anticipated that the Project shall create a minimum of 5 additional jobs.

The Developer will not develop the project in the redevelopment area or elsewhere without the benefit of the benefits under the redevelopment contract. The costs and risks of the project are simply too great to be absorbed by the Developer without this assistance.

The Agency shall grant to the Developer 100% of the proceeds of the Bonds. The Developer shall use the proceeds to acquire the Premises and prepare the same for development, per activities outlined in Exhibit E.

11. Cost Benefit Analysis. This Plan when presented for recommendation and approval shall be accompanied by a cost benefit analysis. Such analysis is as follows:
  - a. Tax shifts resulting from the approval of the use of funds pursuant to section 18-2147: This project will create minimal retail jobs. This is not likely to result in new City residents and therefore, will not increase student load for the school system.
  - b. Public infrastructure and public service needs: No additional infrastructure or public services are anticipated. Sales tax generated by the construction and operation of the facility will more than reimburse the City for any unforeseen expenses over time.
  - c. Impacts on employers and employees within the project area: None exist. Therefore no impact is expected.
  - d. Impacts on employers and employees in the city, but not in the project area: The construction of the facility will result in a slight increase in temporary employment.
  - e. Other impacts: No significant negative additional impacts are anticipated.
